ADVERTISING

Laser Advertising creates unrivaled opportunities to capture the eye and the mind. Animations projected with laser technology tend to have greater impact than images using conventional display technology; as a result, they linger in the memory for far longer.

LANDMARK ADVERTISING

Use ILP Pro Software Suite to create client logo's, animated storyboards and texts for projection in FULL COLOR onto Billboards or building facades on busy thoroughfares. In shopping malls, airports, shop walls or windows, during Events or Exhibitions, Create a dynamic crowd stopping spectacle. Automate the advertising projection system to begin and end operation at desired times. Use an IP address to upload new media from a remote location. Go interactive by adding our SMS plug-in. Getting your message across has *never* been easier. ILP Projection Systems suitable for Advertising Applications:
